

Anti-MBP, AlpHcAbs® Rabbit antibody(HRP)

Summary

Code 015-201-005

Immunogen MBP fusion protein

Host Alpaca pacous

lsotype VHH domain of alpaca IgG2b/2c fused to Rabbit IgG Fc(mutation)

Conjugate HRP Specificity MBP

Cross-Reactivity Recognizes MBP specifically. Does not cross-react with other proteins

Purity Recombinant Expression and Affinity purified

Concentration 1mg/ml

Formation Liquid, 10mM PBS (pH 7.5), 0.05% sucrose, 0.1% trehalose, 0.01% proclin300,50% Glycerol

Storage Store at -20 °C(Avoid freeze / thaw cycles), protect from light

Description

Anti-MBP, AlpHcAbs® Rabbit antibody(HRP) is designed for detecting MBP fusion proteins specifically. Anti-MBP, AlpHcAbs® Rabbit antibody(HRP) is based on monoclonal, recombinant, rabbit Fc fused single domain antibody to MBP coupled to HRP. Based on immunoelectrophoresis and/or ELISA, Anti-MBP, AlpHcAbs® Rabbit antibody(HRP) detects MBP fusion proteins selectively, no reactivity with other proteins.

Background

MBP is used to increase the solubility of recombinant proteins expressed in E. coli. In these systems, the protein of interest is often expressed as a MBP-fusion protein, preventing aggregation of the protein of interest. The mechanism by which MBP increases solubility is not well understood. In addition, MBP can itself be used as an affinity tag for purification of recombinant proteins.

Using antibody with Fc(mutation), the background from Fc receptors will be eliminated.

Benefits

High lot-to-lot consistency Increased sensitivity and higher affinity Animal-free production

Application notes

WB 1:5,000-1:20000 ELISA 1:5,000-1:20000

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.
