

Anti-DYKDDDDK tag, AlpHcAbs® Mouse IgG2a antibody

Summary

Code 016-313-001

Immunogen DYKDDDK tag fusion protein

Host Alpaca pacous

Isotype Fab of alpaca IgG1 fused to Mouse IgG2a Fc(mutation)

Conjugated Unconjugated

Specificity DYKDDDDK tag sequence

Cross-Reactivity Highly selective for DYKDDDDK tag sequence
Purity Recombinant Expression and Affinity purified

Concentration 1mg/ml

Formation Liquid, 10mM PBS (pH 7.5), 0.05% sucrose, 0.1% trehalose, 0.01% proclin300, 50% Glycerol

Storage Store at -20 °C, (Avoid freeze / thaw cycles), Stable for 12 months at -20 °C

Description

Anti-DYKDDDDK tag, AlpHcAbs® Mouse IgG2a antibody is designed for detecting DYKDDDDK tag fusion protein specifically. Anti-DYKDDDDK tag, AlpHcAbs® Mouse IgG2a antibody is recombinant fab of alpaca IgG1 fused to mouse IgG2a Fc. Based on western blot and ELISA, Anti-DYKDDDDK tag, AlpHcAbs® Mouse IgG2a antibody reacts with the DYKDDDDK tag selectively, no reactivity with other proteins.

Background

The DYKDDDDK peptide are widely used for detecting, manipulating or purifying proteins. This peptide can be expressed and detected with the protein of interest as an amino-terminal or carboxy-terminal fusion. Because of its small size, DYKDDDDK tag is unlikely to affect the tagged protein's biochemical properties. DYKDDDDK tag is useful for the labeling and detection of proteins using immunoblotting, immunoprecipitation, and immunostaining techniques.

Using antibody with Fc(mutation), the background from Fc receptors will be eliminated.

Benefits

High lot-to-lot consistency Increased sensitivity and higher affinity Animal-free production

Suggested Working Concentration

ELISA 1:10,000-1:50,000

WB 1:10,000-1:50,000

Flow Cyt 1μg for 10⁶ cells

ICC/IF 1:200-1:1000

IP 1-2ug/sample

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.
