

Anti-DYKDDDDK tag, AlpHcAbs[®] Mouse IgG1 antibody

Summary

Code	016-323-001
Immunogen	DYKDDDDK tag fusion protein
Host	Alpaca pacous
Isotype	Fab of alpaca IgG1 fused to Mouse IgG1 Fc(mutation)
Conjugate	Unconjugated
Specificity	DYKDDDDK tag sequence
Cross-Reactivity	Highly selective for DYKDDDDK tag sequence
Purity	Recombinant Expression and Affinity purified
Concentration	1mg/ml
Formation	Liquid, 10mM PBS (pH 7.5), 0.05% sucrose, 0.1% trehalose, 0.01% proclin300, 50% Glycerol
Storage	Store at -20 °C, (Avoid freeze / thaw cycles), Stable for 12 months at -20°C

Description

Anti-DYKDDDDK tag, AlpHcAbs[®] Mouse IgG1 antibody is designed for detecting DYKDDDDK tag fusion protein specifically. Anti-DYKDDDDK tag, AlpHcAbs[®] Mouse IgG1 antibody is recombinant fab of alpaca IgG1 fused to mouse IgG1 Fc. Based on western blot and ELISA, Anti-DYKDDDDK tag, AlpHcAbs[®] Mouse IgG1 antibody reacts with the DYKDDDDK tag selectively, no reactivity with other proteins.

Background

The DYKDDDDK peptide are widely used for detecting, manipulating or purifying proteins. This peptide can be expressed and detected with the protein of interest as an amino-terminal or carboxy-terminal fusion. Because of its small size, DYKDDDDK tag is unlikely to affect the tagged protein's biochemical properties. DYKDDDDK tag is useful for the labeling and detection of proteins using immunoblotting, immunoprecipitation, and immunostaining techniques.

Using antibody with Fc(mutation), the background from Fc receptors will be eliminated.

Benefits

High lot-to-lot consistency
Increased sensitivity and higher affinity
Animal-free production

Suggested Working Concentration

ELISA	1:10,000-1:50,000
WB	1:10,000-1:50,000
Flow Cyt	1µg for 10 ⁶ cells
ICC/IF	1:200-1:1000
IP	1-2ug/sample

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.
