

Anti-Alpaca IgG2b+2c, AlpHcAbs[®] Rabbit antibody (HRP)

Summary

| | |
|------------------|--|
| Code | 053-206-005 |
| Immunogen | Recombinant Fc region of alpaca IgG2b/2c |
| Host | Rabbit |
| Isotype | Rabbit IgG |
| Conjugate | HRP |
| Specificity | Alpaca IgG2b+2c(Fcγ Fragment specific) |
| Cross-Reactivity | No cross-reactivity with Alpaca IgG1 |
| Purity | Recombinant Expression and Affinity purified |
| Concentration | 1mg/ml |
| Formation | Liquid, 10mM PBS (pH 7.5), 0.05% sucrose, 0.1% trehalose, 0.01% proclin300, 50% Glycerol |
| Storage | Store at -20 °C(Avoid freeze / thaw cycles), Stable for 12 months at -20°C |

Description

Anti-Alpaca IgG2b+2c, AlpHcAbs[®] Rabbit antibody(HRP) is designed for detecting Alpaca IgG2b+2c specifically. Based on immunoelectrophoresis and/or ELISA, Anti-Alpaca IgG2b+2c, AlpHcAbs[®] Rabbit antibody(HRP) reacts with Alpaca IgG2b+2c selectively, no cross-reactivity with Alpaca IgG1.

Background

The biological family Camelidae comprises camels (one-humped *Camelus dromedarius* and two-humped *Camelus bactrianus*), llama (*Lama glama* and *Lama guanicoe*), and vicugna (*Vicugna vicugna* and *Vicugna pacos*). Camelidae contain two kinds of IgG in serum: conventional antibodies (IgG1) containing two light chains and two heavy chains (composed of the VH, CH1, hinge, and CH2 and CH3 domains) and two types of homodimeric heavy-chain antibodies (HCAbs), IgG2 and IgG3, which comprise only H chains; each H chain contains a VHH, hinge, and CH2 and CH3 domains. The smallest intact functional antigen-binding fragment of HCAbs is the single-domain VHH, also known as a nanobody(Nb). Alpaca is also called *Vicugna pacos*. Alpaca IgG contains IgG1a, IgG1b, IgG2b, IgG2c and IgG3.

Benefits

High lot-to-lot consistency
Increased sensitivity and higher affinity
Animal-free production

Suggested Working Concentration

ELISA 1:4000-1:10000
WB 1:4000-1:10000

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.
