Bingding Control Nanoselector Agarose

Summary

Catalog No	100-100-100
Ligand	No Ligand
Bead size	~ 40 μm
Reactivity	No reactivity with any proteins
Storage	Shipped at ambient temperature. Upon receipt store at 4°C. Stable for 1 year. Do not freeze
Storage buffer	Formulation 50 % slurry in PBS containing 20 % Ethanol

Description

Bingding Control Nanoselector Agarose is the control agarose resins which consist of the same agarose matrix as our Nanoselector Agarose.

Background

When using Nanoselector Agarose, some proteins, DNA may react with the agarose. Those unspecific binding may influence the experimental results. Using Bingding Control Nanoselector Agarose can eliminate the effects of unspecific binding, and make the experimental results more reliable.

Application notes

Control of unspecific binding of proteins, DNA, etc. to agarose beads Pre-clearing of cell lysate
