Description

Anti-Mouse IgG kappa, AlpSdAbs[®] VHH(PE) is designed for detecting mouse IgG kappa chain specifically. Anti-Mouse IgG kappa, AlpSdAbs[®] VHH(PE) is based on recombinant single domain antibody to mouse IgG kappa chain fused to PE. Based on immunoelectrophoresis and/or ELISA, Anti-Mouse IgG kappa, AlpSdAbs[®] VHH(PE) reacts with the mouse IgG kappa chain selectively, no reactivity with the mouse IgG lambda chain or heavy chain of mouse IgG.

Background

VHH are single-domain antibodies derived from the variable regions of heavy chain of Camelidae immunoglobulin. The size of VHH is extremely small(<15KDa) compared to other forms of antibody fragment, which significantly increase the permeability of VHH.

Benefits

High lot-to-lot consistency
Increased sensitivity and higher affinity
Animal-free production

Application notes

Flow Cyt 1:200-1:1000
ICC/IF 1:200-1:1000

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.
